No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                ......VKASGSSHCRAGQTGVCLIM 476

Sequence 16, Application US/08198446B
Sequence 16, Application US/08198446B
Patent No. 567496
GENERAL INFORMATION:
APPLICANT: Hartwell, Leland H.
APPLICANT: Hartwell, Leland H.
APPLICANT: Groudine, Mark T.
TITLE OF INVENTION: Cell Cycle Checkpoint Genes
NUMBER OF SEQUENCES: 19
CORRESPONDENCE ADDRESS:
ADDRESSEE: Christensen O'Connor Johnson Kindness PLLC
STREET: 1420 Fifth Ave., Suite 2800
STREET: MA
COUNTRY: USA
COUNTRY: USA
COMPUTER: IBM PC Compatible
OPERAING SYSTEM: PC-DOS/MS-DOS
SOFTWARRE: Patentin Release #1.0, Version #1.25
COMPUTER: PREBA-104 PATA:
APPLICATION NUMBER: US/08/198,446B
FILING DATE: 18-FBB-1994
CARSIFICATION: 18-FBB-1994
CARSIFICATION: 18-FBB-1994

                                       MYOSIN LIGHT CHAIN.
-!-CATALYTIC ACTIVITY: ATP + [myosin light-chain] = ADP + [myosin light-chain] phosphate.
-!- ENZYME REGULATION: POSSESSES AN AUTOINHIBITORY DOMAIN.
--- AUTOHUSPHORYALATION APPEARS TO INCREASE THE ENZYMATIC ACTIVITY.
DOES NOT HAVE A CALMODULIN-BINDING DOMAIN.
-!- SIMILARITY: BELONGS TO THE SER/THR FAMILY OF PROTEIN KINASES.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   'n

CONTRACTOR TO THE STATE OF A LEADY A SHORT (BA) AND LONG (AL) (SHOWN HERE). TYPE B SHORT (BS) AND LONG (AL); ARE PRODUCED BY ALTERNATIVE SPLICING. TYPE A AND TYPE B ISOFORMS DIFFER RESPECTIVELY BY THE PRESENCE OF THE DOUBLECORTIN DOMAIN. AN ALTERNATIVE SPLICING OCCURRING IN 3' OF THE MRNA PRODUCES THE LONG INSTEAD OF THE SHORT ISOFORMS.

1 TISSUE SPECIFICITY: IN FETAL TISSUES, HIGHLY EXPRESSED IN BRAIN, DETECTABLE IN LUNG AND LIVER, BUT NOT IN KIDNEY. IN ADULT TISSUES, EXPRESSED UBIQUITOUSLY IN THE BRAIN, DETECTABLE IN THE HEART, INTESTINE AND COLON. THE TYPE A ISOFORMS SEEM TO BE EXPRESSED ABUNDANTLY IN FETAL BRAIN WHEREAS TYPE B ISOFORMS ARE EXPRESSED ABUNDANTLY IN SETAL BRAIN WHEREAS TYPE B ISOFORMS ARE EXPRESSED ABUNDANTLY IN SETAL BRAIN WHEREAS TYPE B ISOFORMS ARE EXPRESSED ABUNDANTLY IN COMMESSED.

1 SIMILARITY: BELONGS TO THE SER/THR FAMILY OF PROTEIN KINASES.

2 CAME SUBBRAMILY.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       This SWISS-PROT entry is copyright.
